Certificate III in Warehousing Operations

# Warehousing Operations

## Who is this course for?

The Certificate III in Warehousing Operations is intended for people who want to learn how to coordinate goods for distribution to customers. They will learn how to use inventory systems to conduct stock counts and apply product knowledge to organise receivals and dispatches.

## Licensing, Legislative, Regulatory Considerations

The transport and logistics industry is tightly regulated by a range of regulations, licence arrangements and codes of practice which pertain to many different aspects of operations including safety, health, hygiene, security, anti-discrimination, equal employment opportunity, quarantine, and customs and immigration.

Examples of regulations relevant to various standards include but are not limited to:

- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements including mass and loading regulations and state/territory oversize/mass pilot/escort permit requirement
- fatigue management regulations and codes of practice
- relevant state/territory road rules

This certificate is for:

- **forklift drivers** - people who lift, stack and unstack articles and materials using diesel, electric, gas or petrol powered trucks equipped with fork attachments, load transport vehicles, or move raw materials and finished goods to processing or despatch areas of factories
- **store person** - people who manage goods in and out, use inventory systems, perform stocktake and manage the supply and handling of goods
- **packers** - people involved in racking, stocktake, picking and packing of products for shipment and distribution to customers

## What qualifications do participants receive upon completion of the course?

Participants receive a nationally recognised, competency-based qualification developed by industry as a benchmark for recruitment and training.

Certificate outcomes for Warehousing Operations courses are:

- TLI31610 Certificate III in Warehousing Operations

As part of the Australian Qualifications Framework these qualification are nationally recognised.

## Can a participant gain license?

Yes, RAISE Training is able to incorporate licensing as part of the course:

The types of licensing available include:

- LF Class Forklift Licence
- WP Class Elevating Work Platform Licence

Operators will be trained & assessed against the WorkCover competency standards by our Trainer and WorkCover accredited assessors. After the required standard of competency has been achieved the WorkCover Authority will issue the appropriate license.

*Conditions apply.*

## What is required in this Qualification?

A total of 18 units of competency are required to complete this qualification, consisting of 2 core units and 16 elective units.

A large range of units relevant to the Warehousing and Storage industry are on offer to cover the diversity of the industry.

Certificate III in Warehousing Operations has a 24-month nominal term for a full time employee. Part-time employees (greater than 21 hours per week) can undertake this course with an increased term.

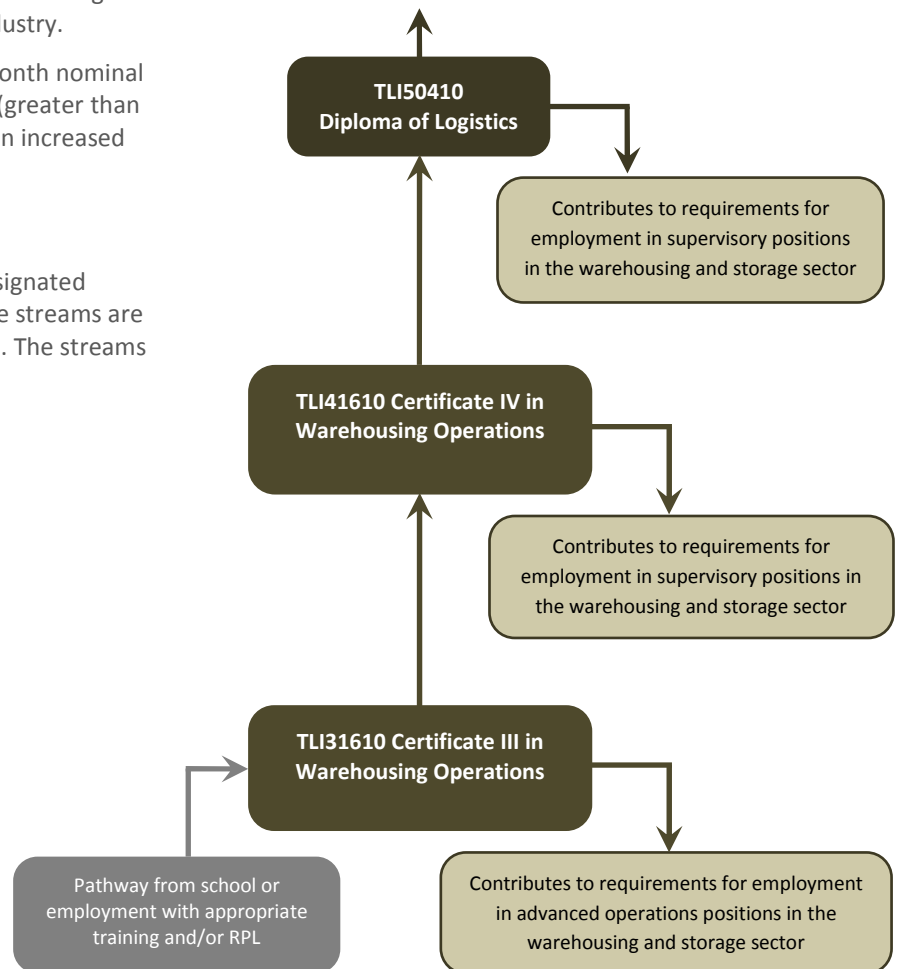

## Qualification Structure

The Transport and Logistics Training Package has designated streams that each unit of competency fits into. These streams are based on the skills and tasks required to be assessed. The streams applicable to this qualification are as follows:

- Handling Stock/Cargo
- Equipment Checking and Maintenance
- Driving Vehicles
- Load Handling
- Documentation and Calculations
- Occupational Health and Safety
- Teamwork
- Quality
- Computers and Technology
- Resource Management

## Career Pathways

Pathway to further qualifications and careers in logistics and warehouse management.
